the distributive property then combining like terms. If you're seeing this message, it means we're having trouble loading external resources on our website. If you're behind a web filter, please make sure that the domains *.kastatic.org and *.kasandbox.org are unblocked.

Combining like terms with distribution (practice) | Khan ...

To do that, we're going to apply the distributive property a couple of different ways. First, we're going to use this to combine like terms. You'll notice we have this $x \cdot 3$ here plus $3x \cdot 3$. What we can do here is we can do this. Of course, it's assumed to have a 1 before it. Essentially, we have $1 \times x \cdot 3 + 3 \times x \cdot 3$.

Distributive Property/Combining Like Terms Jeopardy Template

You're gonna have to do some
distribution and then some combining of
like terms. All right, now I'm assuming
you've had a go at it. Now let's work
through this together. So as I mentioned,
when I see this three times the entire
expression $5x$ plus six, I want to
distribute that three. So I want to
multiply that three times $5x$ and that
three ...
