Scientific notation on a TI-84 Plus calculator looks a little different than what you're used to seeing in class. For example,  $2.53 \times 10^{12}$  will display as 2.53 E 12. You can enter an expression in scientific notation by pressing [2nd][,] to type an E , but entering an expression in scientific notation doesn't guarantee that your answer will remain in scientific notation.

Row reducing a matrix can help us find the solution to a system of equations (in the case of augmented matrices), understand the properties of a set of vectors, and more. Knowing how to use row operations to reduce a matrix by hand is important, but in many cases, we simply need to know what the reduced matrix looks like.
