If the variables disappear, and you get a statement that is always true, such as $0 = 0$ or $3 = 3$, then there are "infinite solutions", meaning, when graphed, the two equations would form the same line. If the variables disappear, and you get a statement that is never true, such as $0 = 5$ or $4 = 7$. then there is "no solution", meaning, when graphed, ...

If a set is not finite, it is called an infinite set because the number of elements in that set is not countable and also we cannot represent it in Roster form. Thus, infinite sets are also known as uncountable sets. So, the elements of an Infinite set are represented by 3 dots (ellipse) thus, it represents the infinity of that set.
